

ERLPhase Power Technologies: Dec 09 Update

Welcome to ERLPhase Power Technologies e-mail updates where we keep you informed of the latest news about ERLPhase and our products. You'll be the first to hear about product updates and to access our latest case studies, application notes, educational videos, or tools released by our customer service team. We hope you'll enjoy this window into our company and we look forward to delivering updates that are valuable and interesting for you.

ISO 9001:2008 QMS Certified

We are very proud to announce that ERLPhase is now an ISO 9001:2008 QMS certified organization for design, distribution and service of relays and recorders for the power industry.

New 4000 Series Relays & Recorders

ERLPhase introduces our new 4000 series of popular PRO Relays and TESLA Power System Recorders:

- Built on a new fully type-tested, substation-hardened hardware platform
- Powered by a new processor that will allow major changes in how you work with your device
- Embedded with IEC 61850 station bus communications
- Enhanced with user configurable DNP mapping list

We continue to support our existing hardware platforms and always recommend that you visit our website for details on the latest firmware that is available for your product.

Please visit www.erlphase.com/products.php or www.erlphase.com for more information about our products.

Expanding Latin American Team

We are extremely pleased to welcome Ricardo Fernandez as our Regional Sales Manager for Latin America, Central America and Mexico. Based in Sao Paulo, Brazil, Mr. Fernandez brings 20 years of experience in technical commercial sales for utilities and industrial customers.

With a career's commitment to quality and building of long-term utility and industry relationships, Mr. Fernandez will fit in well with the team at ERLPhase. He will work very closely with Hugo Davila, Regional Technical Manager for Latin America, Central America and Mexico, to support our customers in this area.
