

RecordBase Central Station

v3.1

Release Description

DESCRIPTION

This release adds compatibility with records created by units that support leap second.

FEATURE ENHANCEMENTS

- Add compatibility with records created by units that support leap second.

CORRECTIONS TO ISSUES

- None.

COMPATIBILITY

Compatible with TESLA 2000 firmware:	v2.1 to v4.1
Compatible with TESLA 3000 firmware:	v2.7 and below
Compatible with TESLA 4000 firmware:	v1.9 and below
Compatible with TESLA 4003 firmware:	v1.0
Compatible with TESLA LITE firmware:	v1.1
Compatible with RecordBase View:	v4.1

Minor releases, designated with a letter suffix (e.g. v3.1a), maintain the same compatibility as their base version (e.g. v3.1=v3.1a).

CLASSIFICATION OF CHANGES MADE

The issues fixed in software / firmware upgrades are classified as defined below. While the decision to upgrade installed products is the user's, these classifications provide a guideline for the need and priority of the upgrade.

Critical: Critical changes fix issues/problems that prevent the basic operation of the device and have no workaround. Critical changes merit a product upgrade as soon as possible, if that function is being used under the conditions causing the issue

Major: Major changes fix problems that prevent the basic operation of the device but do have a workaround. Any major changes merit a product upgrade as soon as possible if the function is being used under the conditions causing the issue and a workaround is not acceptable.

Minor: Minor changes fix non vital issues that do not prevent the basic operation of the device and may or may not have a workaround. Product upgrades for such changes are not necessary unless they apply to and are needed by the user.

Feature Enhancement: Feature enhancements add a capability or extend existing capabilities of the product. Upgrades for such changes need be made only if and when that feature enhancement is desired.
