

S-PRO 4001

Firmware v2.0a

Release Description

DESCRIPTION

This release improves diagnostic retrieval speed and also corrects some known issues to enhance reliability when settings are changed.

FEATURE ENHANCEMENTS

- Enhanced system diagnostic file retrieval speed via network ports.

CORRECTIONS TO ISSUES

- **Critical:** Enhanced error handling when setting files are corrupted or missing.

COMPATIBILITY:

Compatible Relay Control Panel Software:	v2.7 or above
Compatible S-PRO 4000 Offliner Settings Software:	v2.1 or above
Compatible RecordBase View Software:	v3.4 or above
ERL 61850 IED Configurator	v2.0 or above

Minor releases, designated with a letter suffix (e.g. v3.1a), maintain the same compatibility as their base version (e.g. v3.1=v3.1a).

CLASSIFICATION OF CHANGES MADE

The issues fixed in software / firmware upgrades are classified as defined below. While the decision to upgrade installed products is the user's, these classifications provide a guideline for the need and priority of the upgrade.

Critical: Critical changes fix issues/problems that prevent the basic operation of the device and have no workaround. Critical changes merit a product upgrade as soon as possible, if that function is being used under the conditions causing the issue

Major: Major changes fix problems that prevent the basic operation of the device but do have a workaround. Any major changes merit a product upgrade as soon as possible if the function is being used under the conditions causing the issue and a workaround is not acceptable.

Minor: Minor changes fix non vital issues that do not prevent the basic operation of the device and may or may not have a workaround. Product upgrades for such changes are not necessary unless they apply to and are needed by the user.

Feature Enhancement: Feature enhancements add a capability or extend existing capabilities of the product. Upgrades for such changes need be made only if and when that feature enhancement is desired.
